# Fifty Years of Horticultural Progress

## ANNIVERSARY CATALOG

It is with great pleasure and pride that we place this catalog in your hands. It's the biggest yet, and we hope that you will find it helpful not only in planning your 1960 garden, but also as a constant reminder that we at McARDLE's are always anxious to help you with your garden problems.

### THE SAME LOCATION FOR 50 YEARS

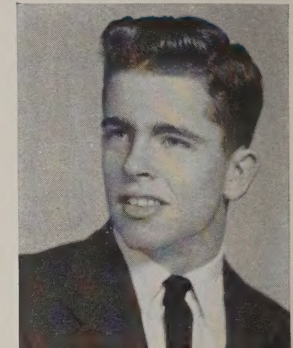

In 1910 McARDLE's occupied one store only, of the above three-store building. Today, 1960, McARDLE's occupy all three stores with additional storage space in the rear of the building and a warehouse located at 71 Greenwich Ave.

MRS. PETER J. CRUISE

JAMES B. McARDLE

JAMES B. McARDLE, JR.

## FIFTY YEARS AGO

One spring day 50 years ago Mr. and Mrs. James B. McARDLE left the services of Vaughan's Seed Company in New York City to establish McARDLE's Seed Store. Upon the death of James B. McARDLE in 1918, Mrs. McARDLE (now Mrs. Peter J. Cruise) operated the business along with Peter J. Cruise, who passed away in 1957. Today, James B. McARDLE, the son of the founders, owns and operates the business. He was graduated from Cornell University in 1936, where he specialized in Floriculture and Horticulture. James B. McARDLE, Jr., who is associated with the business, is now attending Cornell University and is also specializing in Floriculture and Horticulture.

### TED CRAWLEY

Ted Crawley, 1947-1960, thirteen years of service. Ted is assistant manager. His specialty is power equipment, and he also assists in making up our yearly garden book.

### ANN DeFILLIPO

Ann DeFillipo has been associated with McARDLE's since 1943. She is the cashier of the organization as well as Mr. McARDLE's secretary.

### JOHN CHIAPPETTA

John Chiappetta, 1936-1960, twenty-four years of horticulture. John has two titles: Manager and Dispatcher. He's the one who gets your order to you promptly.

### JOHN WILLIAMS

John Williams has been associated with McARDLE's as a salesman since 1953. John is easily recognized by the pencil he constantly has on his ear. He claims it distinguishes him from the customers.

# Fifty Years of Friendly Service to Garden Lovers 1910 1960

**JULIE PARISI**

Julie Parisi has been affiliated with McArdle's since 1955. She is in charge of accounts payable and also does clerical work.

**THE STAFF**

The above group constitutes the staff of McArdle's. They welcome the opportunity to serve you for many years to come, and they thank you for the confidence placed in them in the years gone by.

## Thank You

At this time McArdle's wish to thank the people of Greenwich and neighboring communities for their liberal support and patronage during the past 50 years. We aim in the future to serve your needs in a manner that will merit your continued confidence. It is very pleasant to say that new customers at McArdle's have a way of becoming old customers because we try so hard to serve them honestly and in good faith.

### JEAN MATTISON

Jean Mattison has been associated with McArdle's since 1954. She is in charge of accounts receivable and has the responsibility of seeing that our customers receive their bills.

### RICHARD STEWART

Richard Stewart, known as "Cuz," has been employed by McArdle's as a sales representative since 1952. Most of his time is spent calling on our dealer accounts in the Westchester and Fairfield areas.

## NEW MERION BLUE FORMULA

McArdle's are introducing, on the occasion of their 50th Anniversary, a new Merion Blue Grass Seed Formula. This is a mixture of grasses containing Merion Blue, Kentucky Blue, Fancy Red Top and Pennlawn Fescue. It was tried, tested and proved to do very well in this locality. 2-lb. box \$3.95; 5 lbs. \$8.95; 25 lbs. \$43.75; 100 lbs. \$170.00.

# Grass Seed Especially Adapted to Greenwich and Vicinity

## McArdle's Quality GRASS SEEDS

### Grass Mixtures for Sunny Places

#### *Turf-Maker*

Highest quality lawn seed available anywhere. Blended to produce fine permanent lawns. Contains Certified Colonial Bent, Creeping Red Fescue, heavyweight Kentucky Blue Grass and Rough Bluegrass (*Poa trivialis*). 1 lb. covers 300 sq. ft. Lb. \$1.75; 5 lbs. \$8.59; 25 lbs. \$38.25; 50 lbs. \$73.50.

#### **Turf-Maker with Merion Blue Grass**

Contains Merion Blue Grass, Pennlawn Creeping Red Fescue and Kentucky Blue Grass. This formula is 100% permanent. 1 lb. will sow 335 sq. ft. Lb. \$2.59; 5 lbs. \$12.45; 25 lbs. \$57.50.

#### **McArdle's Special**

Our own special mixture particularly adapted to soil conditions in this locality. Possesses exceptional staying qualities and produces a rich green lawn. Use 6 lbs. per 1000 sq. ft. Lb. \$1.29; 5 lbs. \$5.95; 25 lbs. \$27.25; 100 lbs. \$105.00.

#### **Sunilawn**

Although Sunilawn has a rougher texture than the higher-priced mixtures, we consider it very practical. It grows well under rough soil conditions and contains white clover, which we highly recommend. Use 6 lbs. per 1000 sq. ft. Lb. 85 cts.; 5 lbs. \$3.95; 25 lbs. \$19.00; 100 lbs. \$75.00.

#### **Tuffy**

This is a quick-growing, economical mixture of grasses. We do not recommend it for permanent lawn areas, although it is often used for such. Again we say that the high-priced grass seed mixtures are the least expensive when you consider the high cost of reseeding and renovating. Lb. 79 cts.; 5 lbs. \$3.45; 25 lbs. \$15.75; 50 lbs. \$29.95.

### **Town of Greenwich Grass Seed Mixture For Sun or Shade**

#### **ESPECIALLY ADAPTED FOR THIS LOCALITY**

This is the same formula that is used in the beautiful parks of the Town of Greenwich. Because of its high fescue content, it is adapted to shade and sun. Its velvety green color is outstandingly good, and its texture is very fine. The Illahee Creeping Red Fescue in this mixture helps fight crabgrass. The repeat business on this new mixture also indicates to us that those who have tried it are most satisfied with the results. Lb. \$1.25; 5 lbs. \$5.75; 25 lbs. \$27.00; 100 lbs. \$100.00.

### Seaside Mixture

A special mixture of hardy grasses for use in the vicinity of salt water. Contains Seaside Bent, Kentucky Blue, Creeping Red Fescue and Fancy Red Top. Use 1 lb. per 100 sq. ft. Lb. \$1.35; 5 lbs. \$6.40; 25 lbs. \$30.00; 100 lbs. \$118.00.

### **Vaughan's Merion Blue Grass**

Vaughan's Merion Blue Grass is a selected strain of Kentucky Blue Grass which is more resistant to heat and stays green more during the hot summer months. Another big advantage is that it is resistant to fungus diseases. Since the seed is high-priced and small, we recommend that you use a Vaughan's Merion Blue Grass Seeder. 1 lb. will sow 750 sq. ft. Lb. carton \$2.29; 5-lb. bag \$11.25; 10-lb. bag \$22.50; 25-lb. bag \$55.00; 50-lb. bag \$108.50; 100 lbs. \$210.00.

### **Vaughan's Merion Formula Master Blend**

This is a mixture of the latest and best grasses containing at least 40% Merion Blue, Delta Kentucky Blue Grass and Pennlawn Fescue. A grass seed mixture is preferred because it is an added insurance for a good lawn. Each grass has its own particular likes and dislikes, so that by using a blend you make sure that at least one of the team will feel at home. Each grass also germinates at different rates of speed, and as a result the quicker growing grass nurses the slower growing grasses until they become established. This formula is 100% permanent. 1 lb. will sow 750 sq. ft. Lb. carton \$1.98; 5-lb. bag \$9.65; 10-lb. bag \$18.80; 25-lb. bag \$46.00; 50-lb. bag \$90.00; 100 lbs. \$178.00.

### Grass Mixtures for Shady Places

#### *Turf-Maker*

FOR SHADE

The perfect companion for Turf-Maker. Blended of the finest shade-tolerant grasses. Contains Creeping Red Fescue, *Poa trivialis*, Cheeping Fescue and Fancy Red Top. 1 lb. covers 300 sq. ft. Lb. \$1.75; 5 lbs. \$8.59; 25 lbs. \$38.25; 50 lbs. \$73.50.

### **McArdle's Shady**

Another one of our special mixtures particularly adapted to shady areas in this vicinity. Contains Fescue, Kentucky Blue Grass and Rye Grass. Use 6 lbs. per 1000 sq. ft. Lb. \$1.29; 5 lbs. \$5.95; 25 lbs. \$27.25; 100 lbs. \$105.00.

### **Plant WHITE CLOVER with Grass Seed**

For sunny locations we recommend using 5 to 10% White Clover in a grass seed mixture. It stays green in dry weather and it helps to crowd out crabgrass. For best results use the new Wild White Clover, which is more compact and much more durable than the Common White Clover.

**English Wild White Clover.** Lb. \$2.00.

**Common White Clover.** Lb. \$1.25; 10 lbs. \$12.00.

# McArdle's Individual Grasses and Field Seeds

**ILLAHEE CREEPING RED FESCUE.** A permanent lawn grass that is particularly adapted to the shade. It spreads from the roots, making a dense turf which tends to crowd out weeds. Because of its deep roots, it is capable of standing dry weather. Grows well in sunny areas also. Lb. \$1.10; 10 lbs. \$10.50; 25 lbs. \$25.00.

**KENTUCKY BLUE GRASS.** Used mostly as a lawn grass. A permanent type of grass that produces dense, tough sod of a deep green color. It is slow in becoming established. Lb. \$1.25; 10 lbs. \$12.00; 25 lbs. \$27.50.

**FANCY RED TOP.** A nurse grass that lives about three years on turf kept cut. It gives a fine texture the first year of growth and then becomes quite coarse during the second and third years. It makes quick growth and nurses the permanent grasses until they become established. Lb. \$1.00; 10 lbs. \$9.50; 25 lbs. \$22.50.

**TIMOTHY.** A tall-growing Meadow Grass used mostly for hay and pasture. Grows quickly. Lb. 50 cts.; 10 lbs. \$4.50; 25 lbs. \$10.00.

**COLONIAL BENT.** This permanent grass, very fine in texture, is similar to that used on putting greens. Spreads rapidly by creeping underground roots. Requires close cutting and plenty of moisture. Lb. \$1.50; 10 lbs. \$14.00; 25 lbs. \$32.50.

**DOMESTIC RYE GRASS.** Also known as Common Rye Grass. A quick grower often used in lawn grass seed mixtures as a nurse grass to prevent the soil from washing. Lb. 35 cts.; 10 lbs. \$3.00; 25 lbs. \$7.00; 100 lbs. \$24.00.

**ORCHARD GRASS.** A field grass used in pastures and meadows. Lb. 75 cts.; 10 lbs. \$7.00; 25 lbs. \$16.25.

**PENNLAWN FESCUE.** A creeping red hybrid Fescue bred at Pennsylvania State University. It provides thick green cover for shady places and sandy soils, and it shows excellent heat and disease resistance. Lb. \$1.10; 10 lbs. \$10.50; 25 lbs. \$25.00.

**PERENNIAL RYE GRASS.** A short-lived perennial lasting three to four years. Used as a nurse grass in lawn seed mixtures and also in meadow mixtures for hay and pasture. Good for a temporary lawn. Lb. 45 cts.; 10 lbs. \$4.00; 25 lbs. \$9.00.

**POA TRIVIALIS.** Rough-stalked Meadow Grass. This variety of Blue Grass is available again. Thrives in shaded lawn areas. Deep green in color. Lb. \$1.10; 10 lbs. \$10.50.

GRUBS OF JAPANESE BEETLE

## H H Lawn Fertilizer 8-6-4 (With Chlordane)

Combination Lawn Food and Grub Killer. Saves time and labor. Feeds lawns as it kills beetle grubs, chinch bugs, cutworms, ants, etc. Use 15 to 20 lbs. per 1000 sq. ft. on established lawns, and 25 to 30 lbs. per 1000 sq. ft. on new lawns. 50 lbs. \$5.00; 500 lbs. \$47.50; 1000 lbs. \$90.00.

**ITALIAN RYE GRASS.** A good temporary grass to grow in shaded areas. It is coarse in texture, like the other rye grasses. Lb. 35 cts.; 10 lbs. \$3.00; 25 lbs. \$7.00.

**CHEWING FESCUE.** A permanent grass particularly adapted to the shade. The blades are very fine and wiry and are gray-green in color. Its deep roots and tough texture makes it a very hardy and durable grass. It will also grow in sunny areas. Lb. \$1.00; 10 lbs. \$9.50; 25 lbs. \$22.50.

## Miscellaneous Field Seeds

**BUCKWHEAT.** Use  $1\frac{1}{2}$  to 2 bu. per acre. Used as a summer cover crop. 48 lbs. per bu. Lb. 15 cts.; bu. \$6.50.

**SOYBEANS, Black Wilson.** Black-seeded variety. Use  $1\frac{1}{2}$  to 2 bu. per acre if sown broadcast. In this section used mostly as a cover crop for improving the soil. 60 lbs. per bu. Lb. 20 cts.; bu. \$9.50.

**SEED OATS.** Use  $2\frac{1}{2}$  to 3 bu. per acre. Often used as a cover crop. 32 lbs. per bu. Lb. 15 cts.; bu. \$4.50.

**SPRING RYE.** Sow 2 bu. per acre. A valuable crop to plow under for soil improvement. Requires about three months to mature. 56 lbs. per bu. Lb. 15 cts.; pk. \$2.00; bu. \$7.00.

**FIELD CORN, Hybrid U. S. 13.** 1 peck per acre. Lb. 50 cts.; pk. \$4.00; bu. \$12.00.

## Field Clovers

(60 lbs. per bu.)

Clovers are legumes. They take nitrogen from the air and put it into the soil and are, therefore, real soil improvers.

**ALFALFA.** A forage plant yielding an immense crop of hay. It likes lime. Sow 20 to 30 lbs. per acre. Lb. \$1.00; 10 lbs. \$9.50.

**ALSIKE.** A perennial Clover usually sown with other field grasses such as timothy and Red Clover. Excellent for pasturage or hay. Lb. 80 cts.; 10 lbs. \$7.50.

**LADINO CLOVER.** A large type of white Clover used in pasture mixtures for grazing, hay and silage. It is a good soil improver. When sown alone, 3 to 4 lbs. per acre is used. If sown with a mixture, 1 to 2 lbs. is recommended. Lb. \$1.25; 10 lbs. \$11.00.

**RED CLOVER, DOMESTIC.** One of the most nutritious of forage plants. If sown broadcast, 10 to 15 lbs. per acre is used. Lb. 90 cts.; 10 lbs. \$8.50.

## In Seeding Sloping Areas— USE SALT HAY

Salt Hay is now used in the making of lawns on sloping areas or steep banks where there is danger of the seed and soil washing out from heavy rains. The Salt Hay is applied after the seed is sown and left until the grass begins to develop. At the same time it also shades the newly seeded area and helps to prevent the soil from drying out. For this same reason also Salt Hay is often used on level areas in late spring or early summer seeding.

Since it contains no weed seed, it also makes an ideal mulch for the garden. Widely used in rose beds and around tomatoes and strawberries. It not only keeps the weeds down, but also retains moisture in the soil. Bale covers approximately 400 sq. ft. \$4.95 per bale.

## A Temporary Lawn of Domestic Rye Grass and White Clover

Where lateness of season, poor soil, or other conditions prevent one from making a permanent lawn, we recommend using a mixture of Domestic Rye 95% and White Clover 5%. Use 5 to 6 lbs. per 1000 sq. ft. When ready for the permanent lawn, this may be turned under. You thereby not only improve the physical condition of the soil by incorporating this green manure into it, but also increase the fertility content. Before reseeding permanently, apply a 10-6-4 lawn fertilizer at the rate of 10 lbs. per 1000 sq. ft. Grass Seed Mixture containing 95% Domestic Rye and 5% White Clover, lb. 40 cts.; 10 lbs. \$3.50; 25 lbs. \$7.50; 100 lbs. \$28.00.

## MEADOW GRASS MIXTURE

An ideal mixture for meadows and pasture. Use 100 lbs. per acre. Contains Timothy, Perennial Rye Grass, Orchard Grass and Red Clover. Lb. 75 cts.; 10 lbs. \$7.00; 25 lbs. \$17.00; 100 lbs. \$65.00.

## MEADOW GRASS FERTILIZER

Fertilize your meadows and pasture areas with a complete fertilizer known as 5-10-5. It contains 5% nitrogen, 10% phosphoric acid and 5% potash. Apply as early as possible in the spring. Use 1200 lbs. per acre. 80 lbs. \$4.00; 800 lbs. \$35.00; 2000 lbs. \$77.00.

## THE CYCLONE SEED SOWER

An accurate portable seeder for all broadcast sowing. Fits over the shoulder and is provided with automatic adjustment for stopping flow of contents when required. 5 lb. capacity. \$5.95.

Prices on separate grasses and field seeds are subject to market fluctuations and therefore are subject to change without notice.

## Chinch Bugs

These chinch bugs under glass are magnified seven times. Chinch bugs attack grass by piercing their tiny beaks into the grass stems to suck out juices. The grass wilts and turns brown. They are active in full sun only. They are especially active in hot, dry weather from early June until frost. Use Scotts Cope to kill these insects.

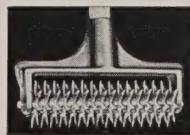

## Scotts Mower The finest mower you can buy

Not just another electric mower. Scotts took seven years to design the Silent Scotts. In every detail it's the finest, safest mower ever made—a pleasure to operate. Starts instantly without fueling mess or engine roar. Gives a clean crew-cut at the exact height you dial. Incredibly quiet; wide-ray night lights and magnetic safety brake. No maintenance costs. Scotts unconditional 5-year guarantee includes repairs and parts.

**Deluxe Model \$119.95; Reel for Electric Cord \$29.95**

## New Tool Speeds Growth on Bare Spots in the Lawn

The Lawn Garderator is a handy tool for patching up bare spots in your lawn area. You can break up compacted soil and soil crusts without injuring or tearing the turf, thereby preparing the area for reseeding. After seeding, roll the garderator back and forth over the seeded surface. This insures good cover and prevents loss of seed from wind, rain and birds. Mr. McArdle classifies this implement as one of his favorite tools. \$4.95 each.

Scott it—you've got it . . . a Better Lawn for Less!

- 393A TORENIA Fournieri. 1 ft. Curious individual blooms of bluish purple marked with yellow centers. A useful annual for shady places. Pkt. 15 cts.;  $\frac{1}{2}$  oz. \$1.25.

## Flowers to Plant Early Indoors

Some annuals that can be started indoors or in the hotbed are: Dwarf Dahlias, Asters, Alyssums, Verbenas, Petunias, Carnations, Salvias, Nicotiana, Ageratum, Sweet Peas, Snapdragons, Lobelias, Phlox Drummondii, and Stocks. The seed may be started in flower pots or even old coffee cans provided they are properly drained; use the new sterile medium, Vermiculite, rather than soil. Individual varieties should be kept separate in each container. Such containers require less space than flats, and may be handled much more easily. Set the container in a saucer or similar receptacle which is constantly filled with water. The pot automatically soaks up the amount of moisture required. To insure against damping off, mix Rootone disinfectant with the seeds at time of planting.

## Annuals for Shade

Generally speaking, annuals are not lovers of shade. Some do well in partial shade, and as there are many such spots in gardens the following are recommended for them

Anchusa	Godetia
Balsam	Impatiens
Begonia	Nicotiana
Browallia speciosa major	Schizanthus
Clarkia	Torenia
Coleus	Vinca rosea
Cynoglossum	

**VINCA rosea.** 1 ft. The glossy green foliage makes a pleasing background for the clusters of single blooms. Widely used in borders and beds. Start the seed in February or March. Will bloom from July to frost.

450A Pink. 450B White. 450C Red. 450D White with Black Eyes. Each variety, pkt. 35 cts.;  $\frac{1}{2}$  oz. 60 cts.

# GARDEN-FRESH VEGETABLES TASTE BEST

Varieties of vegetables that are starred ★ are especially adapted to freezing

## Vegetables to Start Early Indoors

Vegetables that can be started indoors or in the hotbed are: Artichokes, Broccoli, Brussels Sprouts, Cabbage, Cauliflower, Celery, Eggplant, Leek, Lettuce, Parsley, Onions and Tomatoes. February 15 to March 15 is time enough for most of these vegetables. The seed may be started in flower pots, using the new sterile medium, Vermiculite, rather than soil. Individual varieties should be kept separate in each pot. The pots require less space than flats and may be handled much more easily. To insure against damping off, mix Rootone Disinfectant with the seeds at time of planting. When the seedlings are ready to be moved, they may be transplanted into flats or directly into the hotbed.

### Asparagus

Plant as early in the spring as the soil can be prepared. Dig a trench a foot wide and as deep. Use 5 pounds of a complete fertilizer and 10 pounds of hydrated lime for each 50-foot row. Cover fertilizer with soil and set the roots 8 inches below the surface of the trench. Space them 18 inches apart, with 3 feet between rows. Cover roots with several inches of soil and firm each root well; as the shoots grow, the trench can be filled in with soil.

★**Mary Washington.** 2-year-old roots, \$6.00 per 100. 3-year-old roots, \$8.00 per 100.

### Artichoke

Plant early in a greenhouse or hotbed. Set outside in May in rows 3 feet apart, space 2 feet apart in the row. Mulch in winter. Plants usually bear the second year. The flower buds are eaten boiled or raw.

**296 Green Globe.** Pkt. 25 cts.; 1/4oz. 75 cts.; oz. \$2.00.

## Beans, Green-Pod Bush

Plant after danger of frost has passed, and prepare the soil well. Sow in short rows at intervals of two weeks for a continuous supply. Set seed 1 1/2 inches deep, 3 inches apart, with at least 2 feet between rows. Spray both sides of foliage with rotenone to check Mexican bean beetle. 1 pound will plant 100 feet of row.

## Edible Soy Beans

**588 Bansei.** 95 days. Sow 1 pound per 100-foot row. 1/2lb. 50 cts.; lb. 85 cts.

## Vegetables to Start Early Outdoors

Onion Sets, Peas, Radish, Lettuce, Spinach and Parsley. These are the frostproof vegetables and can be planted as soon as the ground can be worked.

## Brussels Sprouts

Start seed indoors or in a coldframe. Transplant to moist, well-drained soil, allowing 2 feet between plants and 3 feet between rows. As sprouts begin to form at base of lower leaves, remove these leaves but always allow foliage to remain at top of plant for normal growth.

★**504 Long Island Improved.** 80 days. Pkt. 25 cts.; 1/4oz. 40 cts.; oz. \$1.20.

**504A JADE CROSS.** 1959 All-America Silver Medal Winner. Brussels Sprouts will be more widely planted in home gardens than ever before as a result of the introduction of this superior new variety. It is an F<sub>1</sub> hybrid, an early producer, most uniform and prolific. Sprouts are ready for use in approximately 75 days. For early use, plants should be set out in the spring as early as possible. For fall use, plants should be set out July 15. Light frosts seem to improve the flavor. Thirty to fifty plants will provide a generous supply for an average family. Pkt. 50 cts.; 1/8oz. \$2.50; 1/4oz. \$4.50; 1/2oz. \$7.50.

## Broccoli

For an early crop, start seed in hotbed or in a flat indoors. Set plants out as soon as soil can be worked; space 24 inches apart, in rows 2 feet apart. Be sure soil is well prepared and fertilized. For fall crop start seed in open ground in early June. Keep plants growing vigorously by using a commercial fertilizer that contains boron.

★**503 Calabrese.** 70 days. Pkt. 25 cts.; 1/2oz. 50 cts.; oz. 90 cts.

**179A Broccoli-Rapa.** Cooking greens. Pkt. 15 cts.; oz. 75 cts.

**503B Waltham 11.** 60 days. Late summer and early fall variety. Pkt. 25 cts.; 1/2oz. 50 cts.; oz. 90 cts.

## Beets

Sow as soon as soil can be worked easily. Make plantings in short rows 10 to 15 feet long, at intervals of two weeks for a continuous supply. Cover seed with 1/2 inch of soil; allow 18 inches between rows. When large enough to handle, thin seedlings. Beets are best to use when 2 inches in diameter. The tops of Beets may be used for greens in the early stages.

**558 Crosby's Egyptian.** 50 days.

**556 Detroit Perfected.** 55 days.

**555 Asgrow Early Wonder.** 50 days.

**197 Savoy, Perfection Drumhead.** 90 days. Pkt. 25 cts.;  $\frac{1}{2}$ oz. 50 cts.; oz. 90 cts.

## Chinese Cabbage

Plant seed in open ground, thinning young plants to stand 1 foot apart, in rows  $2\frac{1}{2}$  feet apart. Does best when soil is moist. Ideal fall crop not damaged by frost. Sow seed outdoors from June 15 to July 1 for fall crop.

- 196 Michihli.** 70 days. Pkt. 15 cts.;  $\frac{1}{2}$ oz. 50 cts.; oz. 85 cts.

## Cauliflower

Start seed indoors or in a coldframe. Set plants 2 feet apart, with 3 feet between rows. Essentially a cool-weather crop; keep plants in vigorous growth by feeding with complete fertilizer. When heads are 4 inches in diameter, tie leaves together to blanch.

- ★**501 Super Snowball.** 88 days. Pkt. 35 cts.;  $\frac{1}{4}$ oz. \$1.40;  $\frac{1}{2}$ oz. \$2.50.

## Bean Beetle Dust

Lucky Strike No. 1000 Dust is especially prepared to kill Mexican bean beetles. It is non-poisonous and may be used even if the Beans are on the plant. Bean beetles are no longer a problem when you use this material. Also can be used to kill the cabbage worm. Lb. 65 cts.; 5 lbs. \$2.25.

## Carrots

Sow seed in open ground as soon as the soil can be prepared. Seed is sometimes slow to germinate. Cover with  $\frac{1}{2}$  inch of soil; allow 18 inches between rows. Thin seedlings to stand 3 inches apart as soon as they are large enough to handle. For a continuous supply sow in short rows at intervals of two weeks. 1 ounce will sow 100 feet of row.

- 485 Chantenay.** 70 days.  
**479 Danvers Half-Long.** 75 days.  
**482 Imperator.** 78 days.  
**483 Nantes Half-Long.** 68 days.

## Chicory

- 511A Witloof (French Endive).** 110 days. Pkt. 25 cts.;  $\frac{1}{2}$ oz. 45 cts.; oz. 75 cts.

## Corn, Sweet

Corn must not be planted until all danger of frost has passed. To sow in rows, set seed 1 inch deep and 3 inches apart; later thin young plants to stand 10 inches apart. Allow 2 feet between rows for easy cultivation. When planting in hills, put 6 seeds in each. Place hills 2 feet apart each way, and thin the young plants, leaving 3 or 4 to a hill. For good pollination plant at least three rows side by side. Make successive sowings at two-week intervals.

**JUST RIGHT.** Only Silver Medal Winner in All-America Vegetable Selections for 1960. The new and only F<sub>1</sub> hybrid Turnip. Many home gardeners plant these small globe-type Turnips for their edible roots. Just Right will become extremely popular because it combines the lush green, edible tops with a very good white root. Thus the tops can be used like spinach, while the roots are good boiled or even used raw. The "pot likker" from the greens tastes far better than any Bourbon or Scotch, hot or cold. Try it on your guests as an appetizer instead of bouillon or clam broth. These Turnips mature in two to three months. If desired, two crops can be grown, the first in early spring and the second in late summer for fall use. One or two packets of Turnip seed will provide more than enough for the average family. Turnips are not damaged by fall frost. The roots can be dug and stored in a cool basement. Pkt. 50 cts.

## Raspberries

Space plants 3 to 4 feet apart, with 5 to 6 feet between the rows. Set them 2 to 3 inches deeper than they grew in the nursery. Cut back these young plants to 6 to 8 inches.  
**Indian Summer.** Everbearing. Red fruit. \$2.25 for 5.  
**Cumberland.** Black fruit. \$2.25 for 5.  
**Latham.** Red fruit. \$2.25 for 5.

## Tomato

Start seed indoors in a hotbed or coldframe. Transplant seedlings as soon as they are large enough to handle. It takes six to eight weeks to grow plants large enough to set out. Plants must not be set out in open ground until all danger of frost has passed. Make provisions for stakes, since better-quality Tomatoes are obtained from plants that are tied to stakes. Days to maturity listed are from time plants are set in the garden.

## NO-SEED HORMONE BLOSSOM-SET

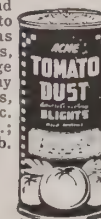

### FOR BETTER TOMATOES

Makes tomatoes ripen 1 to 3 weeks earlier. Stops blossom drop. Makes every tomato flower set fruit. Plant bears fruit earlier, tomatoes are larger, firmer, more deliciously flavored; many are seedless. Excellent, too, for cucumbers, peppers, eggplant and squash. 4 ozs. 75 cts.; 1 pt. \$1.75; 12-oz. Aerosol bomb \$1.79.

## Acme TOMATO DUST

A general garden insecticide and fungicide with special emphasis on complete tomato protection. Controls early and late blight, as well as hornworm, fruit worm and flea beetles on tomatoes, cucumbers, beans, cabbage and potatoes, and on many flowers such as hollyhocks, asters, roses, azaleas, etc.

8-oz. Pump Gun 98 cts.; 1-lb. sifter 89 cts.; 4-lb. bag \$1.98.

## G & O Tomato-Food

A new formula especially developed to grow good tomatoes. Contains 3% nitrogen, 12% phosphoric acid and 13% potash. The nitrogen promotes good foliage, the phosphoric acid induces fruiting, and the potash good root development. 5 lbs. 95 cts.; 10 lbs. \$1.65; 25 lbs. \$3.50.

**TOMATO, Burpee's Big Boy**  
Pkt. (30 seeds) 50 cts.

## SUPER COLLECTION OF LARGE-FLOWERED DAHLIAS

Six Different Colors. Each Root is Labeled. **\$2.50**

In this collection we pack six outstanding varieties in the higher price range. Complete planting and growing instructions are included. Here is an opportunity to secure six leading kinds at a price much lower than they could be bought individually.

### POMPON DAHLIA COLLECTION

Six Different Colors

**\$1.85**

Six choice pompon varieties are packed in this collection. Each root is labeled. Grow 18 inches high.

#### LILIUM regale (Regal Lily)

Plant bulbs 5 inches deep in spring, as early as possible. Grows 4 feet high; blooms in July. 3 for \$1.45; \$5.50 per doz.

#### LILIUM auratum (Gold-Banded Lily)

Plant bulbs 9 inches deep. Blooms in August and September. Grows 4 to 5 feet high. 3 for \$2.00; \$7.50 per doz.

#### LILIUM speciosum magnificum

Plant bulbs 8 inches deep. Blooms in August. Jumbo bulbs, 3 for \$2.00; \$7.50 per doz.

### TUBEROSES

#### Double Excelsior, Dwarf Pearl.

2 ft. Its exquisite fragrance and beautiful flower spikes, which are borne on long stems, make it an admirable cut-flower. \$2.00 per doz.; \$3.75 for 25; \$14.00 per 100.

#### Single, Mexican Everblooming.

\$2.00 per doz.; \$3.75 for 25; \$14.00 per 100.

#### DOUBLE TUBEROSE Dwarf Pearl

#### FIREKING LILY

### THE FIREKING LILY

The Fireking Lily is unusual because of its brilliant reddish orange color and its habit of producing a tremendous number of flowers (40 to 50) on a single stem. Blooms late June to end of July. \$1.25 each; \$12.00 per doz.

### FOOD FOR BULBS

Dahlias, gladiolus, lilies, begonias and other summer-flowering bulbs require an abundance of plant food. This prize-winning fertilizer contains 5% nitrogen, 6% phosphoric acid, and 15% potash. The nitrogen induces that luscious foliage, the phosphorus promotes bigger and better blooms and the potash is needed for good root development. 5 lbs. 95 cts.; 10 lbs. \$1.60; 25 lbs. \$3.50; 50 lbs. \$6.00.

LILY-OF-THE-VALLEY PIPS. For outdoor planting. 25 for \$3.00; \$10.00 per 100

### Camellia-Flowered Begonias

Especially adapted to shady areas

Bulbs may be started indoors in February or March. Plant one bulb in a 4 or 5-inch pot and cover with about 1 inch of soil. A soil mixture that contains  $\frac{1}{4}$  leaf mold or peat moss and  $\frac{3}{4}$  garden loam is ideal. Water sparingly until bulbs make growth.

These bulbs may also be planted directly outdoors any time after May 15. They may be set 9 or 10 inches apart. From bulbs started indoors early, you can enjoy a longer flowering period than from those planted directly outdoors. When set outside, they should be planted in a moist, shaded area.

White, Pink, Yellow, Red, Salmon, Copper  
Any of above colors, 3 for \$1.00; \$3.50 per doz.

### Special Collection Camellia-Flowered Begonias

3 white, 3 pink, 3 yellow, 3 red, 3 salmon, 3 copper

#### LARGE-FLOWERED DAHLIAS

Mrs. George Le Boutillier (red), White King (white), Jane Cowl (copper and gold).

#### BEGONIAS

##### Pendula or Hanging Type

Fine for hanging baskets and window boxes. Start tubers inside in March or April or directly outside after May 15. For best results give them a partially shaded location. Plant one bulb in an 8-inch hanging basket or three bulbs in a 14-inch hanging basket. In a window box space the bulbs 6 to 8 inches apart. Flowers are double and are available in shades of scarlet, rose, yellow, salmon, apricot and white. 60 cts. each; 6 for \$3.50; \$6.75 per doz.

ISMENE (Peruvian Daffodil)

#### Giant-Flowering Dahlias

**Arthur Godfrey.** Formal Decorative. Enormous flower of orient red with buff shadings. \$1.00 each; 3 for \$2.75.

### McARDLE'S TRUCKS

Our trucks travel 100,000 miles per year delivering garden merchandise in Fairfield and Westchester counties, at an approximate cost of \$25,000.00. George Hagen, the driver of the big truck, is the father of 10 children. He delivers mostly out of town, servicing our 200 dealer customers. He has been in our employ since 1957.

John McGrath, also known as "Ike," has been delivering for McARDLE's since 1956. He claims he has delivered over a million bags of fertilizer. Harry O'Neil is the newest addition to the McARDLE gang. He has been associated with McARDLE's since 1958. Harry is also in charge of the warehouse.

### ORDER BY TELEPHONE SAVE TIME

Phone your order to us. Our Telephone order desk is well staffed so that your inquiries and orders will be handled understandingly. Free delivery in Greenwich, and also to such outlying districts as Port Chester, Harrison, White Plains, Mount Kisco, Stamford, and New Canaan.

### Plants Available in May and June

Space the plants  $2\frac{1}{2}$  to 3 feet apart. To obtain bushy plants it is advisable to pinch the growing shoots once or twice during the season. The first pinching should be done when the plants are about 6 inches tall. At this time remove about an inch of the soft growing tips of the main shoots, to induce lateral branching. When these lateral branches are 10 inches tall, another inch of their tips should be removed. Early-blooming varieties should not be pinched after July 15, while the later blooming varieties may be pinched until August 1.

## BOVUNG COW MANURE FOR ROSES

In the spring, carefully prepared dry cow manure is especially recommended for use in beds. It will not burn and may be used at the rate of 20 lbs. per 100 sq. ft. or 1 qt. per plant. 10 lbs. \$1.25; 25 lbs. \$1.85; 50 lbs. \$3.00; 500 lbs. \$28.50.

## QUALITY OF McARDLE'S ROSES

We believe you would prefer to pay the slight difference in price for the best in Roses rather than a lower price for inferior quality. The difference in satisfaction will be well worth while because of better flowering qualities. All McARDLE'S Roses are individually wrapped to insure you the best. Each plant is properly labeled so that any mix-up on varieties, which commonly occurs in mail-order houses, is carefully avoided. On the right is an illustration of one of our Roses packed in moist moss.

# ROSES FOR EVERY GARDEN

## NEW! ALL-AMERICA WINNER FOR 1960

**Sarabande**, a Patented Floribunda. Rated as one of the finest Floribundas of all time. Its wonderful, iridescent orient-red is even and clear all through, and holds the eye irresistibly. The bright yellow stamens add to its attraction power, making the most striking and beautiful color contrast with the lively orange-red. The plant is low growing and compact—ideal for the border or for a low Rose hedge. \$2.95 each.

# AZALEAS • RHODODENDRONS • PACHYSANDRA • MYRTLE

**PACHYSANDRA**

Pachysandra is the ideal ground cover under Maple trees and other shaded areas where grass will not grow. Before setting out plants, apply Bovung Cow Manure to the soil at the rate of 10 lbs. per 100 sq. ft. Space plants 1 ft. apart. Flat of 100 plants for \$7.95.

**RHODODENDRONS**

We offer a variety of sizes in Hybrid Rhododendrons, varying in price from \$5.50 to \$20.00. Rhododendrons prefer an acid soil and should be fed with an acid plant food such as Holly-tone (see page 54). A mulch of peat moss to retain the moisture in the soil is most beneficial.

**MYRTLE**

Myrtle is another popular ground cover for shaded areas where grass will not grow. It stays green all year and has lovely blue flowers in the spring. \$3.50 per doz.; \$25.00 per 100.

**MOUNTAIN LAUREL (*Kalmia latifolia*)**

Mountain Laurel is the Connecticut State Flower. It is a broadleaf evergreen. Requires an acid soil and should be fed with an acid plant food such as Holly-tone. The pink flowers in June plus the fact that it retains its foliage all year makes it most desirable. We offer collected stock of Mountain Laurel at an extremely attractive price. Plants are 8 to 12 inches high. \$2.00 each; 3 for \$5.00.

**AZALEAS. 60 cts. each; \$6.50 per doz.**

We are offering Azaleas in small sizes to enable the home owner to plant in quantity. These young plants will not usually bloom the first year, but they will flower the second year. Peat moss should be incorporated into the soil before planting. They also prefer an acid plant food such as Holly-tone. We have three colors available: Pink, White, and Red. In addition, we have available larger sizes ranging in price from \$1.95 to \$4.95.

## PRUNING MADE EASY

by  
Edwin F. Steffek

In this complete book are explained the simple steps to successful pruning. 120 pages of helpful suggestions and important do's and don't's are also included for the beginner and the advanced gardener, the student and professional. \$2.95

**PRUNING**—A good rule on when to prune an established flowering shrub is that shrubs that bloom in spring on wood of the previous year's growth are pruned in late spring or early summer—that is, immediately after blooming. Those that bloom later, on growth of the current year, are generally pruned in late winter or early spring.

## NEW Climbing Strawberries SONJANA

An amazing discovery of the German plant wizard, Reinhold Hummel, Sonjana is far more than a Strawberry. It is a beautiful and fruitful ornamental covered thickly with attractive, dark green leaves. It scrambles vigorously upward on a fence, pole or trellis. The long runners will grow to as much as 6 feet in a season, and if trained on a supporting structure, will need only a couple of square feet of bed space to grow a lot of berries good to eat. Enjoy the thrill of growing this remarkable and completely different plant in your garden. \$2.50 each; 3 for \$6.95.

**PHLOX subulata** (Rock Phlox)  
85 cts. per basket (large clump)

Many hardy perennials and biennials (plants that require two years to produce bloom, after which they set seed and die) are easily grown from seed. An important thing to remember is that seed should be started as early as possible in order to develop good-sized plants which will winter over easily. Seedlings of most perennials can be carried over winter with the protection of a light mulch. Most biennials, however, require covering or wintering in a coldframe, especially in exposed areas. Raising your own plants from seed is an easy and inexpensive way to develop a perennial border.
